

<< HOW TO INPUT TCP INFORMATION >>

Example : 「TCP2(space)NIKKO/HANAKOMS(space)S8DHEF」

①

②

③

① The number of all parties including TCPs and passengers in the relevant PNRs.

② Last/First name for the TCP other than relevant PNR. **(Space cannot be entered.)**

(Up to 60 characters can be entered except for previous and following spaces.)

③ Locator of TCP **(Do not enter anything after the locator)**

※Note when writing in the Free Text column :

「/(Slash)」 can be use only once. However, space and number cannot be used.

• Enter only 1 accompanying main passenger name if there are several accompanying passengers.

• In case a part of the itinerary is the same as an accompanying passenger, entering the portion

by free text right after the last/first name is permitted. However, entering the flight number/date is not permitted.
