

SKY SUITE 777 will be deployed between Narita and New York

- JAL SKY Wi-Fi to be progressively introduced on European routes -

TOKYO March 4, 2013: With raising the notches one class above for all four cabin services and starting to introduce fully flat seat to business class through the significant improvements in spaciousness and functionality of seats, JAL has decided to configure SKY SUITE 777(Boeing 777-300ER aircraft) from early May 2013 on the long-haul route between Tokyo (Narita) and New York (John F. Kennedy) after it was deployed on Narita = London route from January 2013.

Meanwhile, JAL SKY Wi-Fi, currently being an unique internet service among the Japanese airlines, has been served on New York, Chicago, Los Angeles and Jakarta's route, will be expanded sequentially on European routes from April 2013.

Welcome! New Sky is our action slogan, our special way to thanking you. All seats and in-flight service in every class aboard our spacious Boeing 777-300ER airliners will feature sweeping improvements specially created to provide our customers a totally refreshing onboard experience like no other.

[SKY SUITE 777 enters service between Narita and New York]
