

JAL Introduces “JAL SKY Wi-Fi” on Select Domestic routes from July 23, 2014 ~ The second activity under the banner “Embrace New Challenges”~

TOKYO June 30, 2014: Japan Airlines (JAL) will be the first Japanese airline to introduce the in-flight internet service (JAL SKY Wi-Fi)*1 on domestic routes. This new service will onboard the revamped aircraft-JAL SKY NEXT, operated between Tokyo (Haneda) and Osaka (Itami), between Tokyo (Haneda) and Fukuoka and between Tokyo (Haneda) and Hakodate from July 23, 2014.

Under the theme of "A standard that's a step ahead", in addition to the introduction of new cabin interiors, the new in-flight internet service will support onboard passengers to have seamless connectivity with the ground. JAL SKY Wi-Fi will be progressively expanded to 77 aircraft including JAL's domestic Boeing 777s, 767s and 737 through FY2016.

JAL will strive to provide customers with new and innovative products and services under the banner of “Embrace New Challenges”.

*1. Please refer to press release on Oct. 28, 2013-“JAL to Introduce Fully Revamped Cabin Interiors and New In-flight Internet Service on Select Domestic Routes” (<http://press.jal.co.jp/en/release/201310/002694.html>)

3. Service details:

In-flight entertainment (free service)

Rich video content, including sport, gourmet, music and animation is delivered free through the onboard Wi-Fi network. Passengers can enjoy them through their own wireless LAN capable device in addition to check flight information and the JAL website free of charge.

In-flight internet (paid service)

JAL will be the first Japanese airline to provide in-flight internet service on domestic routes by using the satellite connectivity service of the U. S. company gogo. Customers will be able to use the internet and email through their own wireless LAN capable devices, including smartphones, tablets and notebook computers.

5. JAL Mileage Bank campaign

The start date of promotion campaign for JAL mileage Bank members (JMB) will be introduced by the end of August (planned).

6. Connection speed and restrictions

Regarding the Wi-Fi sent via communications satellites, some lags in speed might occur when downloading or streaming videos. To ensure the connection speed, the number of wireless LAN capable device will be restricted when using the in-flight internet service at the same time.

JAL will continue to improve this new service while monitoring passenger use.
