

JAL Group Announces Flight Frequency and Fleet Plans for FY2015 ~ New Boeing 787-9 with the Latest Cabin Interior to Operate Internationally ~

TOKYO January 21, 2015: JAL Group (JAL) today announced its flight frequency and fleet plans on both international and domestic routes for fiscal year 2015 (ending March 31, 2016).

In regards to the airline’s international network, Japan Airlines FY2015 fleet plans include newly added Boeing 787-9s, which will be configured with the airline’s latest cabin interior (JAL SKY SUITE) from July 2015, in addition to the airline’s current JAL SKY SUITE 767/777/787 (*1) configured aircraft. The airline will concurrently expand the availability of aircraft featuring JAL SKY WIDER seats in Economy Class on more international routes in order to further deliver improved service to customers.

Furthermore, JAL will increase flight frequency from 3 to 4 round-trip flights weekly between Tokyo (Narita) and Moscow to meet an increase in business travel demand.

In regards to the airline’s domestic network, JAL will adjust its flight frequency plan on select Japan-domestic routes to meet seasonal demand primarily to and from Tokyo (Haneda), which will result in the reintroduction of continuous summer operations of six domestic routes to provide enhanced customer convenience. Additionally, the airline’s well-received JAL SKY NEXT (*2) service will mainly expand onto more domestic routes to and from Haneda.

The following plans and schedules are subject to government approval.
